

## COOKER MISER 2

The unique automatic fan controller

**COOKERMISER 2**, a current sensing control device which activates an extract fan when a cooker, or other electrical appliances are in use;

There are many **benefits** to using **COOKERMISER 2**, including;

- **Energy Saving**, having an adjustable overrun timer, which can be set to suit all requirements
- **Reducing false fire alarms**, assisting with the compliance of BS 5839 "Limitation of false alarms"
- **Improving kitchen ventilation**, reducing the frequency of re-decoration and decreasing condensation problems

**COOKERMISER 2** is the automatic control system – doing the thinking for you!
