

SHOWER MISER

The unique automatic fan controller

SHOWERMISER, a current or temperature sensing control device which activates an extract fan when a bath or shower is being used;

There are many benefits to using **SHOWERMISER**, including;

- **Energy Saving**, having an adjustable overrun timer, which can be set to suit all requirements
- **Reduces false fire alarms**, Assists with the compliance of BS 5839 “Limitation of false fire alarms”
- **Improves bathroom ventilation**, reduces the frequency of re-decoration and decreases condensation problems

SHOWERMISER is an automatic control system — doing the thinking for you!
